

Fall 2015

- You were a great TA Ranthony, I really appreciate all the help and how well you taught the material we learned, keep doing you. Cheers!
- Ranthony has done a wonderful job teaching this calculus discussion. Not only did her classes correlate with Charles' to help us understand the material, she tried to make it more enjoyable. She was also willing to meet me and help me outside her office hours because I couldn't meet with her then. She understands all the material and does a great job of explaining it when students are confused. By far the best TA I have had at Iowa.
- You are an amazing math teacher, you should have led the lecture too because you are the reason I will pass the class. I am sorry the discussion class is so awkward, I agree with you that it was weirdly quiet. I am a junior and you are my favorite TA I have ever had! Keep on going with teaching! Thank you!
- Ranthony was the only reason I survived half of this course. She is awesome and deserves to be the professor.
- Only had her for a couple of substitute lectures. When I had her she was very clear. Very good.
- I only have three opportunity to attend her class. One is the midterm and two is in the lecture. I think she can explain something really clear and give us lots of help.
- Ranthony was a very good substitute lecturer when Charlie was sick. Very good at explaining things and clearly cares about the course.
- I was never apart of Ranthanys class however she did sub for Charles lecture a few times. Each time she was well organized and explained the material really well for us. What I really like is that she created a review guide before each midterm that all calc students were able to use, it was very beneficial.
- I enjoyed having her substitute the lecture more than having the regular professor teach the course. She is more fluent and understanding in what needs to be covered and how to cover certain materials. She was easier to understand and more helpful. I wish she would have taught the whole course.
- Did an amazing job teaching those lectures that Frohman was unable to make. I believe it was actually much clearer and more effective than Frohman.
